

FINE BILLIARDS TABLES

OUR STORY

Connelly Billiards has been in business for over 30 years building quality billiard tables and related accessories. Now a part of Champion Shuffleboard and Valley Dynamo, Connelly Billiards is poised for growth and can deliver an expanded line of game room products. We build every table under one roof and that brings together the best of the best – we create and design, we buy the wood, we cut it and we stain it. If we didn't build it, we don't ship it. That's what makes us unique, we are truly built in Texas, USA. This allows us the flexibility to customize anything and create an entire game room for you. We listen and make things happen.

OUR LINE

A Connelly Billiard table is built to exacting standards that combine creativity, superior materials, state-of-the-art technology and old-world craftsmanship.

Connelly tables are offered in six different sizes (from 6 to 10 foot) and in several different feature levels, from entry level to professional.

Connelly offers more than 30 meticulously crafted models. Tables are available in many American hardwoods, offering customers more versatility than other billiard table manufacturers. The standard woods, oak and maple are all chosen for their durability, strength and beauty. We also offer specialty woods such as knotty pine, cherry and hickory.

OAK - Fine Northern red oak (*quercus rubra*) is a timeless and revered furniture favorite. Red oak's pronounced grain pattern and inherently hard and durable texture has made it one of America's favorite wood species for decades.

MAPLE - Maple is becoming one of America's most popular furniture and cabinet woods, as its pale color complements contemporary designs. It's very even-grain texture results in a smooth, fine furniture finish.

CHERRY - Long prized for its fine grain that provides a wonderfully smooth finish, cherry (*prunus serotina*) has long been considered the premier furniture wood and makes up much of America's heirloom pieces. Relatively expensive, premium cherry is primarily of Appalachian origin.

CUSTOM WOODS - We also offer species to accent any game room motif, including Southwestern designs in distressed knotty pine, rustic models in hickory, and classic styles in walnut. And if your tastes lend themselves to some other hardwood species, just ask your retailer.

Connelly certified slate from the World's finest quarries is used on our tables. Manufactured to our custom specifications, each set is diamond-honed and perfectly matched to provide a consistently level playing surface.

There are 13 different finishes to choose from, everything from Medium to Traditional Cherry to Pecan. A selection of sight materials including mother of pearl, brass and abalone are accurately inlaid for consistent play. You can choose from a selection of hand-crafted pocket styles to complement your table selection. The result is a table that is uniquely personal and will provide generations of playing pleasure.

THE EXCLUSIVE RAPID RAIL™

The revolutionary Rapid Rail™ reflects our commitment to constantly improve our design through innovation. It combines engineering and superior materials to provide awesome ball response. Each individual rail is laid out and drilled to proportionally accept four rail bolts instead of the industry standard three. The additional rail bolts provide more consistent tension for more consistent play. Combined with the full K-55 profile cushion, the result is precise and true ball response which actually even sounds better. The Rapid Rail™ is a standard feature on all Connelly tables.

THE CUSHION

Billiards in England is more than a family pastime. With massive 12 foot tables, English snooker demands the utmost in cushion performance. Born of English billiard heritage, the phenomenally responsive cushion used by Connelly is technologically superior in every aspect. It is a full K-55 profile cushion sourced from an ISO 9001 certified firm with 160 years in the rubber industry. With a natural rubber-based formulation, the cushion is augmented with just the right touch of materials technology, including canvas backing and a response-enhancing molded compression groove.

THE QUALITY OF HAND CRAFTSMANSHIP

An amazing amount of wood craftsmanship goes into every table we build. We give the fine materials we use the respect they deserve. Everything is checked and then rechecked. Accuracy is the watchword. Many of our people have been building Connelly tables for more than a decade. They are craftsmen. They are committed to building the best possible product. Precision machinery helps in the manufacturing, of course, but in the end it all comes down to a keen eye for detail and a determination to never take short cuts, never settle for almost right.

See your Connelly retailer for complete details.

HOW TO FIT YOUR TABLE.

Before you rush out and purchase your billiard table, make sure you know which size table works best for the room. The following chart walks you through it. Remember that a 57" cue is the "standard size" preferred by most folks, so keep that in mind when reading the chart. If you have questions, discuss them with your retailer. With over 100,000 Connelly tables out there worldwide, your retailer has all the answers.

MINIMUM ROOM SIZE: BY TABLE AND CUE LENGTH
